ABOUT BFI

ByteForge Innovations (BFI) is an SBA-approved Mentor-Protégé Joint Venture between Definitive Innovative Solutions (DIS) and SecuriGence (SG), providing mission-focused IT modernization, cybersecurity, engineering, and enterprise technology solutions to federal government customers. Combining small-business agility with proven enterprise-scale capabilities, BFI leverages its partners' extensive federal experience across the Department of Defense and civilian agencies. Our core capabilities include enterprise IT operations, cloud modernization, cybersecurity, software engineering, systems integration, Zero Trust architecture, cross-domain solutions, and Agile/DevSecOps delivery. BFI is committed to delivering secure, scalable, and cost-effective solutions that enhance mission readiness, strengthen operational resilience, and accelerate federal technology modernization.

SEWP OVERVIEW

NASA SEWP VI – The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support - more than 50,000 orders a year.

FAIR OPPORTUNITY

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding $10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool is the recommended method to assist in this activity and to augment the required decision documentation.

The SEWP Quote Request Tool (QRT) will automatically include the Contract Holders within a selected Group or based on a suggested source.

WHAT'S IN SCOPE FOR SEWP VI?

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC/AV) solutions and services. Technology is ever-evolving and for that reason SEWP's processes enable SEWP Contract Holders to add new commercial technology and IT services to their contract daily, as requested by SEWP customers. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape. SEWP is composed of three (3) scope categories detailed below. If you would like NASA SEWP to determine whether your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov for review and feedback from the NASA SEWP Program Management Office.

SEWP VI includes:

- Category A – ITC/AV Solutions
- **Category B – Enterprise-Wide ITC/AV Service Solutions (BFI contract)**
- **Category C – Mission-Based ITC/AV Service Solutions (BFI contract)**

Customers should select the category that aligns with the principal purpose of the requirement. For a scope review, send the requirement overview, statement of work, performance work statement, or bill of materials to the NASA SEWP Program Management Office using current SEWP procedures.

ORDERING PROCESS

1. **Define the requirement:** Prepare the scope, deliverables, period and place of performance, funding, security requirements, service levels, and evaluation criteria.
2. **Request quotes:** Use the SEWP Quote Request Tool (QRT) at www.sewp.nasa.gov to provide fair opportunity, as applicable, and select the appropriate contract category. Customers may notify BFI's Program Manager and Deputy Program Manager for coordination.
3. **Evaluate and select:** Evaluate quotations under the stated factors and document the selection and price determination.
4. **Issue the order:** The ordering agency's warranted Contracting Officer issues the delivery or task order against the applicable BFI SEWP VI contract. NASA SEWP does not issue agency orders.
5. **Route through SEWP:** Submit the order through current SEWP procedures for review, tracking, and forwarding to BFI.
6. **Begin performance:** BFI acknowledges the authorized order, confirms requirements, identifies the delivery team, and coordinates kickoff. Work begins only after receipt of the order and any required notice to proceed.

Questions during an open request should be submitted through the Quote Request Tool (QRT) at www.sewp.nasa.gov Question and Answer feature, so that all contract holders see the same information.

Order modifications must be authorized by the ordering Contracting Officer and routed through the current SEWP modification process. Ordering activities must also follow their own agency-specific policies and procedures.

SUPPORT POLICIES

How to request support

Contact Vinny Rinehart (vrinehart@bfinnovations.com) and An Ly (aly@bfinnovations.com). Provide the agency and Government contact, order and BFI contract number, relevant invoice, license, shipment, or ticket number, issue description, operational impact, supporting documentation, prior actions, and requested resolution date. BFI will acknowledge and triage the issue, assign an owner, engage the responsible team or provider, communicate status, coordinate corrective action, and confirm closure.

Warranty

BFI performs services in accordance with the terms of each order. Deficiencies in BFI's services identified during the period of performance are corrected at no additional cost to the Government, consistent with the order's inspection and acceptance terms. Any products, licenses, or subscriptions furnished incidental to the services carry the original equipment manufacturer's (OEM) or

publisher's standard warranty, which BFI passes through to the Government; BFI coordinates warranty claims with the OEM on the customer's behalf.

Technical and software support

Technical support for BFI-delivered services is provided by the assigned BFI delivery team under the order. For incidental software and licensed products, BFI coordinates support, maintenance renewals, and license issues with the OEM or publisher and keeps the customer informed through resolution.
